

Question/Issue

I can't change my NC File Name or my program number from the right-click menu in the Operations Manager. The dialog won't even appear. What's wrong?

Answer/Solution

In X3, "Edit Operations / Change NC file Name and Change Program #" are not functioning correctly if the user has Mill Level 2 or Router Plus. Clicking these options will not spawn the dialog that will allow you to change these values.

As a workaround, the You can change these values in "Edit Operations / Edit common parameters".
